Introduction

Subject. The subject site has three existing buildings and some excess land that the owner intends to modernize/develop into a retail/restaurant center. Most of the land parcels surrounding the subject have been assembled for more intensive land uses and market participants consider the subject site as critical to any future rezoning and development plans for the contiguous block. Given our review of competitive market rents and interviews with brokers active on S. Andrews Avenue, most of the primary retail uses in the market area are north of the river in the downtown area. We did not consider the financial documents provided by the owner's representative, as they reflect a 'going concern' interest and not a fee simple interest, required for this assignment. Additionally, the leases provided to us by the owner's representative were signed by the same entity for both the landlord and tenant and were considered as being between related parties and not reflective of market level conditions. Recent land sale transactions south of the subject on S. Andrews Avenue reflects higher prices per SF in anticipation of more intensive uses for redevelopment parcels on this roadway. The subject was previously listed for sale at $12,000,000 but is currently not listed for sale in the market.

Market. Fort Lauderdale's retail market shows signs of moderation but remains fundamentally strong, with leasing activity reaching 1.8 million SF over the last 12 months, down from 2.4 million SF in early 2022. While net absorption has contracted by -510,000 SF, the market maintains a tight 4.4% availability rate, below its five-year average of 4.6%. Major leases from fitness, grocery, home goods, and entertainment tenants, combined with limited new construction (only 42,000 SF expected in 2025) and demographic growth, continue to support the market. Although rent growth has slowed to 1.5% from peak levels of 10.2% in late 2022, and transaction cap rates have risen slightly to 6.0%, the market's strong fundamentals and limited space availability suggest continued outperformance compared to national averages, despite challenges from higher interest rates and elevated land values.

Neighborhood. Downtown Fort Lauderdale is a dynamic central business district (CBD) characterized by a mix of high-rise office buildings, retail centers, restaurants, cultural attractions, and residential developments. Often referred to as the "Venice of America" due to its extensive canal system, the city is a prominent coastal destination with a population exceeding 200,000 residents. The neighborhood benefits from its proximity to major transportation arteries, including I-95, which provides regional connectivity, and US 1, a major commercial corridor. The area is also in close proximity to key regional assets such as the Broward County Convention Center, Port Everglades, and Fort Lauderdale-Hollywood International Airport (FLL), enhancing its appeal for commercial activity.

Property History. The subject property was previously listed for sale at $12,000,000. The property did not transfer ownership and is not currently active on CoStar or any listing agencies in the market. According to Public Records there have not been any transfers or sales in the last 3 years.

Subject Sale History

Total Tax Rate	0.0185433
Assessment Year(s)	2025
Reassessment triggered by sale?	Yes
Tax Exempt?	No
Delinquent?	No
Assessment Comments	The property appraiser determines the market value of a parcel based on market activity prior to the assessment date. The property appraiser ensures that annual value caps, established in the Florida Constitution, are applied to the market value (no more than 3% increase for homestead residential property and 10% for commercial properties). The property's market value with assessment differential for annual value caps applied. Reductions in property tax owed based on applying and qualifying for the exemption (e.g., homestead, military/veteran, etc.). The property's assessed value with exemptions applied. Taxing authority adopts a budget and levies a millage rate to fund the budget. The tax collector applies the millage rate set by taxing authorities to the taxable value provided by the property appraiser. If a property is sold the caps do not apply and the property is reassessed to its market value.

Real Estate Assessment and Taxes

Exposure and Marketing Time

Exposure time is the time a property remains on the market and is defined as:

An opinion, based on supporting market data, of the length of time that the property interest being appraised would have been offered on the market prior to the hypothetical consummation of a sale at market value on the effective date of the appraisal. (USPAP, 2024 ed.).

Marketing time is the time a property would be expected to remain on the market and is defined as:

The reasonable marketing time is an opinion of the amount of time to sell a real or personal property interest at the concluded market value or at a benchmark price during the period immediately after the effective date of an appraisal. Marketing time is a forecast that is made looking forward from the effective date. Marketing time differs from exposure time, which always presumed to precede the effective date of the appraisal. (USPAP Advisory Opinion 7).

Marketing Time		
	Sale Date	DOM
Sale 1	2/3/205	375
Sale 2	1/15/2025	412
Sale 3	12/18/2023	345
Sale 4	11/21/2023	312
Average		361

Based on the marketing times of similar properties in the market and based on discussions with market participants a marketing time of 12 months is estimated and an exposure time of 12 months is estimated.

Strengths, Weaknesses, Opportunities and Threats

Strengths / Opportunities	
Occupancy	Growing demand for land parcels for more intensive land uses.
Location	Within a 10 minute walk to downtown along a primary corridor.
Supply	Limited supply of land for assemblage.

Weaknesses / Threats	
Location	AE zoned area with higher insurance issues.
Economy	Uncertainty in national economy and impact of trade tariffs.
Interest Rates	Inflation concerns and impact on interest rates.

Scope of Work

Background on Scope of Work is here.

Scope Summary - Definition of the Problem
Problem
To estimate the current "As Is" market value
Intended Use
For potential loan underwriting or portfolio monitoring purposes
Intended User(s)
Popular Commercial Lending Group, Inc
Appraisal Report
Based on the intended users understanding of the subject's physical, economic and legal characteristics, and the intended use of this appraisal, an appraisal report format was used.
The appraisal report has been prepared in conformance with guidelines and recommendations set forth in the Uniform Standards of Professional Appraisal Practice (USPAP), the requirements of the Code of Professional Ethics and Standards of Professional Appraisal Practice of the Appraisal Institute, Title XI of the Financial Institution Reform, Recovery and Enforcement Act (FIRREA) of 1989, and the Interagency Appraisal and Evaluation Guidelines (December 2, 2010).

Definition of Market Value

The following is the definition of market value used in the assignment.

Market value means the most probable price which a property should bring in a competitive and open market under all conditions requisite to a fair sale, the buyer and seller each acting prudently and knowledgeably, and assuming the price is not affected by undue stimulus. Implicit in this definition is the consummation of a sale as of a specified date and the passing of title from seller to buyer under conditions whereby:

(1) Buyer and seller are typically motivated;

(2) Both parties are well informed or well advised, and acting in what they consider their own best interests;

(3) A reasonable time is allowed for exposure in the open market;

(4) Payment is made in terms of cash in U.S. dollars or in terms of financial arrangements comparable thereto; and

(5) The price represents the normal consideration for the property sold unaffected by special or creative financing or sales concessions granted by anyone associated with the sale.

Source: Title XI of the Financial Institutions Reform, Recovery, and Enforcement Act of 1989 (FIRREA) 12 CFR 34.42.

Scope of Work
Property Identification
The subject has been identified by reviewing provided and public information including a legal description, assessor plat map(s), site plan, aerial photographs, and a site inspection.
Is this a 'Land Only' appraisal?
Yes
Inspection
An appraisal inspection of the subject property has been made, and photographs taken.
Zoning
A limited review of zoning and applicable land use controls has been made. An AEI Zoning Report is available separately from this Appraisal report.
Market Analysis
An analysis of market conditions has been made. The appraiser maintains and has access to comprehensive databases for this market area (AEI Files, CoStar, PwC, and other sources) and has reviewed the market for sales and listings relevant to this analysis.
Highest and Best Use Analysis
An as vacant and as improved highest and best use analysis for the subject has been made. Physically possible, legally permissible and financially feasible uses were considered, and the maximally productive use was concluded.
Information Sources
The following description is based on our property inspection, assessment records, property deeds, AEI pre-survey questionnaire, leases, property brochure, flyer, Map of boundary survey dated 10/2/2015 provided by John Ibarra & Assoc., Inc., Highland Contractors Inc. construction estimate, Phase I Environmental Site Assessment, Phase II Environmental Site Assessment Report and information provided by the property contact.

Background on Methodology is discussed here.

Utilized Approaches to Value		
Cost Approach		
The subject is considered as vacant land.		
Sales Comparison Approach	x	
Meaningful land sales were available to determine a value indication for the land.		
Income Approach		
The subject is considered as vacant land.		

The use of hypothetical conditions or extraordinary assumptions (if any) may have affected the assignment results.

Hypothetical Conditions
one

Extraordinary Assumptions
Based on our inspection of the subject property, interviews with market participants, review of recent transactions in the subject's competitive market, a review of the South Regional Activity Center plan, and analysis of several land assemblages in close proximity to the subuect, it is highly resaonable to assume that the highest and best use of the subject property is for redevelopment. Based on our highest and best use analysis, the planned use for the existing buildings on the site are considered as an interim use.

Market Analysis

The subject is in the Fort Lauderdale market. A detailed CoStar market report is here.

Source: CoStar | 2025 Q3 YTD

Fort Lauderdale retail leasing activity has moderated over the last 12 months, with over 1.8 million SF leased, down from peak levels of over 2.4 million SF leased through the first quarter of 2022. This moderation in leasing activity is mainly driven by a lack of available space, as total leased SF now makes up over 13% of available space, up from around 11% on average from 2015 through 2019. Limited space availability has resulted in a slowdown in net absorption, which has contracted by -510,000 SF over the last year. Still, the availability rate of 4.4% as of the third quarter of 2025 remains below the five-year average availability rate of 4.6%.

With tenant move-outs remaining below the five-year historical average and limited supply additions, space availability is expected to remain tight, well below the U.S. average for the foreseeable future. The largest leases over the past year have been signed by fitness, grocery, home goods and entertainment tenants, including Crunch Fitness, Publix, Paunted Tree Boutiques and Paragon Theaters.

Demographic growth, along with the return of tourists, continues to further bolster Fort Lauderdale resident and tourism spending. However, this tailwind has moderated over the last year. This has driven softer yet still positive rent gains for retail space in the area, with annual growth at 1.5% from peak levels of 10.2% at the end of 2022.

Despite some deliveries from 2020 through 2023, with just over 700,000 SF added to the market in those years combined, 2024 presented a muted construction pipeline, with just over 42,000 SF expected to be delivered in 2025. Higher interest rates, as well as elevated land values, continue to weigh on developer activity in the market, with construction starts slowing. This should help retail vacancies remain tight at around 4.1%, in line with the 10-year historical average of 4.1% going forward.

Annual transaction volume has moderated from highs in 2021 and 2022. However, the last twelve months saw healthy activity with $800 million transacting. Despite strong fundamentals of tight vacancies and positive rent gains, elevated interest rates, which are driving cap rates higher, are resulting in a moderation in pricing gains. Annual transaction cap rates have risen slightly from a year ago, standing at 6.0%. Despite this, the market's increased attractiveness, coupled with limited availability of space, should drive an outperformance in rent gains and values compared to the national average.

Submarket Overview

The subject property is in the Fort Lauderdale Submarket.

Under Construction SF	40,000
Source: CoStar | 2025 Q3 YTD	

Transaction volume remains healthy, with $800 million in trades over the past 12 months, in line with the five-year annual average of $1.2 billion.

Deals over the last year have also involved properties with redevelopment potential, such as the purchase of The Quay by PEBB Enterprises, BH Group, and Related Group from Mast Capital and AEW Capital Management for $48 million or $577/SF. The property, built in 1988, has a retail center that was 93% leased at sale with tenants including the Boatyard Restaurant, USPS, and Chipotle. This is the third joint venture for the buyers who were interested in an in-fill waterfront site near downtown Fort Lauderdale. The property has an entitlement that allows for 361 residential units and 12,000 square feet of retail and restaurants.

After pricing appreciation of around 30% since 2019, price growth has begun to slow since the second quarter of 2023. Economic headwinds impacting investment activity should further slow pricing gains in the near term as elevated interest rates keep cap rates from contracting significantly. Average transaction cap rates expanded by 50 basis points, from the mid-5% range to the low-6% range, since 2022.

Conclusion

As part of the valuation process for this appraisal, an analysis of market conditions affecting the subject property was conducted in accordance with the scope of work outlined in this report. The following conclusions are based on data collected from reliable sources, including local MLS, CoStar, county records, interviews with market participants, and reflect conditions as of the effective date of September 18, 2025. The commercial real estate market in Fort Lauderdale for Mixed Use properties exhibits [stable/moderate growth/declining] trends. Occupancy rates in the subject's submarket are approximately 4.7%, derived from CoStar market report 2025 Q3 YTD, showing a increase from the previous period, 2024 Q4 levels of 4.3%. Average asking rental rates, based on CoStar market report 2025 Q3 YTD, are currently $33.22 per square foot, which represents(a, an, which are) increase compared to $33.18 per square foot in 2024 Q4. Net absorption in the previous quarter was -216,352.

The market conditions analysis considers both historical trends and current data to provide a credible basis for the valuation. The subject property's value is supported by [e.g., sustained demand and limited competition], though moderated by [e.g., rising borrowing costs or increased vacancy in certain segments]. These findings are consistent with the market evidence analyzed and have been incorporated into the valuation approaches applied in this report. Any assumptions regarding future market trends are clearly identified in the reconciliation section and are based on the data available as of the effective date.

Conclusion

The downtown Fort Lauderdale neighborhood, bounded by I-95, SW 12th Street, West Broward Boulevard, and South Federal Highway, is a thriving commercial hub with a strong economic foundation, excellent accessibility, and a diverse mix of land uses. Its strategic location, robust infrastructure, and proximity to key amenities make it a highly desirable area for commercial investment and development. The neighborhood's ongoing revitalization and strong market demand underscore its stability and growth potential.

Downtown Fort Lauderdale is driven by strong demand for commercial and residential properties. The area has seen significant revitalization, with modernized office campuses, retail spaces, and mixed-use developments attracting businesses and investors. Class A office spaces, such as those along South Federal Highway, offer premium amenities and proximity to key infrastructure, appealing to professional and corporate tenants. The retail sector thrives along major corridors, supported by high visibility and traffic counts. The neighborhood's economic stability is bolstered by its role as a regional employment center and its appeal as a tourist destination, with attractions like the Riverwalk and Las Olas Boulevard nearby. Market trends indicate steady appreciation in commercial property values, driven by limited supply and high demand.

The subject area is well-served by a variety of amenities, including dining, entertainment, and cultural venues. Notable landmarks include the Broward Center for the Performing Arts, the Museum of Discovery and Science, and the historic Stranahan House, all of which enhance the area's appeal. The Riverwalk, a scenic pedestrian pathway along the New River, connects commercial and residential areas, fostering a vibrant urban lifestyle. Retail and dining options range from upscale establishments to casual eateries, catering to diverse demographics. The proximity to beaches and recreational waterways further enhances the neighborhood's desirability.

The subject area is predominantly zoned for commercial and mixed-use development, supporting office, retail, hospitality, and multifamily residential properties. Key commercial corridors, such as West Broward Boulevard and South Federal Highway, feature modern office spaces, retail centers, and professional service establishments. Zoning regulations encourage high-density development, fostering a walkable urban environment with access to public transit, including Tri-Rail and Amtrak stations accessible via I-95. The area also includes historic districts like Himmarshee Village, which blends cultural and commercial uses, contributing to the neighborhood's diverse character.

Subject Property Description

The subject site has access to all typical urban utilities necessary to support its current use and potential future development. The property is served by municipal water and sewer services provided by the City of Fort Lauderdale. Electrical service is supplied by Florida Power & Light (FPL). Natural gas is available through Florida City Gas. Telecommunications services, including telephone, cable, and high-speed internet, are available through multiple providers. Storm water management is handled through municipal storm sewers and on-site drainage systems. All utility connections appear to be adequate for the property's current mixed-use operation, and the infrastructure is in place to support potential future development. The availability and capacity of these utilities enhance the site's development potential and contribute positively to its overall utility.

Site

Site Summary	
	Parcel 1
Parcel ID	50-42-15-01-0711
Land Use	Commercial (Retail)
Proposed Use	Mixed-Use
Highest and Best Use Site as Vacant	Mixed-Use
Highest and Best Use Comments Site as Vacant	The subject site contains 0.8771 acres (38,207 square feet) and is located at 901-917 South Andrews Avenue in Fort Lauderdale, Florida. The property is zoned Residential and Professional Office District, which allows for both residential and professional office uses. After analyzing the four criteria of highest and best use (legally permissible, physically possible, financially feasible, and maximally productive), mixed-use development represents the highest and best use of the site as though vacant. The site's size, location, and zoning support this conclusion. The subject's location along South Andrews Avenue provides good visibility and access, while the parcel size is sufficient to accommodate a mixed-use project with adequate parking and other required site improvements. Mixed-use development is legally permitted under current zoning, physically possible given the site's characteristics, financially feasible in the current market, and would generate the highest return to the land among all legally permissible and physically possible uses, thus representing the maximally productive use.

Improvements

Property Name: Agora Mediterranean Market

Property Type: Mixed Use

Overview: The subject site has three existing buildings and some excess land that the owner intends to modernize/develop into a retail/restaurant center. Most of the land parcels surrounding the subject have been assembled for more intensive land uses and market participants consider the subject site as critical to any future rezoning and development plans for the contiguous block. Given our review of competitive market rents and interviews with brokers active on S. Andrews Avenue, most of the primary retail uses in the market area are north of the river in the downtown area. We did not consider the financial documents provided by the owner's representative, as they reflect a 'going concern' interest and not a fee simple interest, required for this assignment. Additionally, the leases provided to us by the owner's representative were signed by the same entity for both the landlord and tenant and were considered as being between related parties and not reflective of market level conditions. Recent land sale transactions south of the subject on S. Andrews Avenue reflects higher prices per SF in anticipation of more intensive uses for redevelopment parcels on this roadway. The subject was previously listed for sale at $12,000,000 but is currently not listed for sale in the market.

Zoning

Zoning Summary	
Zoning Authority	City - Fort Lauderdale, FL
Zoning District	Commercial
Zoning Code	RAC-RPO
Zoning Type/Description	Residential and Professional Office District
Zoning Density/FAR	50 dwelling units per net acre
Zoning Intent/Summary	This land use designation applies to the geographic area containing a mixture of large scale business, cultural, educational, governmental and residential uses which are in close proximity to mass transit resources (airport, port, rail and bus terminal). The purpose is to foster an active downtown within which one can work, live, entertain and shop without commuting to other districts in the city.; Residential and Professional Office District is intended to promote the preservation and enhancement of existing low-density residential neighborhoods south of the downtown area while providing for the continued development of neighborhood-serving commercial land uses, and professional and office uses similar to those which typically complement nearby governmental, judicial and medical centers.
Permitted Uses	Permitted uses include but are not limited to: Gas Station, General Retail, Restaurant, Housing - Single Unit, Housing - Multiple Units, Manufacturing, Hotel / Motel, Office, Public Service, Shopping Centers
Maximum Building Height	Urban Neighborhoods: Heights above 6 floors and up to 12 floors in the Urban Neighborhood Character Area and RAC-RPO zoning districts shall be reviewed ; Commercial Transition Zone: 150 ft and may be increased 1 ft for every 1 ft of setback from the RAC-CC district boundary, for a distance of 100 ft from the RAC-CC district. Residential Transition Zone: No structure may exceed a height limitation two and one-half times the height of the maximum height of the zoning district outside of the RAC fo
Zoning Parking Requirements	Professional office, Retail sales, Retail service: 1 space per 250 sq ft gfa

The subject site is part of a Residential and Professional Office District. This land use designation applies to the geographic area containing a mixture of large-scale business, cultural, educational, governmental, and residential uses which are in close proximity to mass transit resources (airport, port, rail and bus terminal). The purpose is to foster an active downtown within which one can work, live, entertain and shop without commuting to other districts in the city.; Residential and Professional Office District is intended to promote the preservation and enhancement of existing low-density residential neighborhoods south of the downtown area while providing for the continued development of neighborhood-serving commercial land uses, and professional and office uses similar to those which typically complement nearby governmental, judicial and medical centers. Permitted uses include but are not limited to: Gas Station, General Retail, Restaurant, Housing - Single Unit, Housing - Multiple Units, Manufacturing, Hotel / Motel, Office, Public Service, Shopping Centers. Professional office, Retail sales, Retail service: 1 space per 250 sq ft gfa. The subject is legally conforming.

Conclusion

The subject property is a key component to the South Regional Activity Center. The subject is immediately south of Hardy Park and within a 10-minute walk to the downtown area of Fort Lauderdale. The subject property is a key corner lot parcel of an anticipated larger parcel assemblage in the South Regional Activity Center. The South Regional Activity Center (SRAC) was designed to create a plan for future growth. These efforts are intended to gain feedback from community members and stakeholders to help evaluate and create consensus on the future vision of the SRAC. The SRAC primarily consists of small commercial, office, and medical businesses, single-family and low-rise multifamily residential uses, and the Broward General Medical

We expect the existing site improvements (interim use) will be demolished as redevelopment activity increases in the subject’s market area. Overall, we rate the subject site and existing infrastructure as good.

Assessment and Taxes

Tax Summary	
Taxing Authority	Broward County
Tax Year(s)	2024
Total Tax Rate	0.0185433
Assessment Year(s)	2025
Reassessment triggered by sale?	Yes
Tax Exempt?	No
Delinquent?	No
Assessment Comments	The property appraiser determines the market value of a parcel based on market activity prior to the assessment date. The property appraiser ensures that annual value caps, established in the Florida Constitution, are applied to the market value (no more than 3% increase for homestead residential property and 10% for commercial properties). The property's market value with assessment differential for annual value caps applied. Reductions in property tax owed based on applying and qualifying for the exemption (e.g., homestead, military/veteran, etc.). The property's assessed value with exemptions applied. Taxing authority adopts a budget and levies a millage rate to fund the budget. The tax collector applies the millage rate set by taxing authorities to the taxable value provided by the property appraiser. If a property is sold the caps do not apply and the property is reassessed to its market value.

Real Estate Assessment and Taxes						
Tax ID	Land	Improvements	Other	Total Assessment	Tax Rate	Taxes
50-42-15-01-0711	$1,346,800	$547,600	$0	$1,894,400	0.0185433	$39,268

Notes: The property appraiser determines the market value of a parcel based on market activity prior to the assessment date. The property appraiser ensures that

Tax History						
Assessed Year	Land Assessment	Improvements Assessment	Total Assessment	% Improved	Taxes	% Change
2022	$1,346,800	$547,600	$1,894,400	28.9%	$0	
2023	$1,346,800	$547,600	$1,894,400	28.9%	$39,647	
2024	$1,346,800	$547,600	$1,894,400	28.9%	$39,268	-1.0%

Comments

The property appraiser determines the market value of a parcel based on market activity prior to the assessment date. The property appraiser ensures that annual value caps, established in the Florida Constitution, are applied to the market value (no more than 3% increase for homestead residential property and 10% for commercial properties). The property's market value with assessment differential for annual value caps applied. Reductions in property tax owed based on applying and qualifying for the exemption (e.g., homestead, military/veteran, etc.). The property's assessed value with exemptions applied. Taxing authority adopts a budget and levies a millage rate to fund the budget. The tax collector applies the millage rate set by taxing authorities to the taxable value provided by the property appraiser. If a property is sold the caps do not apply and the property is reassessed to its market value.

Highest and Best Use

Highest and Best Use of the Site

The highest and best use of the site, as vacant, is for Mixed-Use. Background is discussed here.

Highest and Best Use as Though Vacant		
Highest and Best Use as Vacant:		**Mixed-Use**
Legally Permissible	X	Yes
Zoning Code, District		RAC-RPO, Commercial
Permitted Uses		Permitted uses include but are not limited to: Gas Station, General Retail, Restaurant, Housing - Single Unit, Housing - Multiple Units, Manufacturing, Hotel / Motel, Office, Public Service, Shopping Centers
Zoning Change Likely?		Yes
Physically Possible	X	
Land Size		.88 acres, 38,207 square feet
Shape		The site is irregularly shaped
Topography		Moderate slopes
Utilities		The subject's utilities are typical and adequate for the market area.: All Utilities Available
Access		Good
Visibility		Good
Functional Utility		Above Average
Financially Feasible	X	High demand for assembalge parcels
Positive Net Income/Rate of Return?		Yes
Maximally Productive	X	Redevelopment into a more intensive mixed-use.
Does the Use Return Maximum Value?		Yes

The subject site contains 0.8771 acres (38,207 square feet) and is located at 901-917 South Andrews Avenue in Fort Lauderdale, Florida. The property is zoned Residential and Professional Office District, which allows for both residential and professional office uses. After analyzing the four criteria of highest and best use (legally permissible, physically possible, financially feasible, and maximally productive), mixed-use development represents the highest and best use of the site as though vacant. The site's size, location, and zoning support this conclusion. The subject's location along South Andrews Avenue provides good visibility and access, while the parcel size is sufficient to accommodate a mixed-use project with adequate parking and other required site improvements. Mixed-use development is legally permitted under current zoning, physically possible given the site's characteristics, financially feasible in the current market, and would generate the highest return to the land among all legally permissible and physically possible uses, thus representing the maximally productive use.

Land Value

The subject's land value has been developed via the sales comparison approach. Background on the approach is discussed here.

Land Sale Comparables

We have researched four comparables for this analysis; these are documented on the following pages followed by a location map and analysis grid. All comparables are within 1 miles of the subject. All sales have been researched through numerous sources and verified with a party to the transaction or other available information.

Land Sales Summary Table				
Comp	Address City	Date Price	Land SF Price Per Land SF	Sale Comments
Subject	917 S Andrews Ave Fort Lauderdale	 --	38,207 --	
1	1404 S Andrews Avenue Fort Lauderdale	2/3/2025 $2,375,000	10,499 $226.21	The seller and buyer had an extensive negotiation that included the buyer threatening condemnation. The seller indicated that the buyer originally offered $1.9 million for the property. The seller indicated that the transaction price was fair, but considered it slightly above market level
2	1408 S Andrews Avenue Fort Lauderdale	1/15/2025 $2,100,000	6,970 $301.29	Part of a larger land assemblage by North Broward Hospital. The larger parcel has a higher intrinsic value given the more efficient configuration of the final assemblage.
3	250 W Broward Boulevard Fort Lauderdale	12/18/2023 $31,242,000	47,045 $664.09	Redevelopment of an older commercial building into a 49-story, 381 unit multifamily complex with 8,256 SF of commercial space and 426 parking spaces.
4	11 N Andrews Avenue Fort Lauderdale	11/21/2023 $8,000,000	26,572 $301.07	Improved commercial property sold for land value only. The property was approved for higher density by the planning commission. The new development will have 316 multifamily units and 5,000 square feet of retail space.

Sale Comments

Improved commercial property sold for land value only. The property was approved for higher density by the planning commission. The new development will have 316 multifamily units and 5,000 square feet of retail space.

Analysis Grid

The above sales have been analyzed and compared with the subject property. The following adjustments were considered.

Property Rights. All of the sales were fee simple sales, and no adjustments were required for property Rights.

Financing. All of the sales were sold with typical market financing and no adjustments were required.

Conditions of Sale. All of the sales were arm's length transactions, and no adjustments were required.

Market Trends. A market trends adjustment is utilized to account for changes in market conditions that occur between the date of sale of comparable properties and the effective date of the appraisal. The purpose of this adjustment is to ensure that the valuation reflects the current economic environment and its impact on the subject property's market value. Market trends, such as shifts in supply and demand, interest rates, inflation, or local economic factors, can cause property values to appreciate or depreciate over time. The comparable sales tend to reflect current market conditions and were not adjusted for this factor.

Location. A location adjustment is applied to account for differences in the geographic and situational characteristics between the subject property and comparable properties, as location significantly influences a property's market value. The purpose of this adjustment is to ensure that the valuation accurately reflects the impact of factors such as proximity to key amenities, traffic patterns, visibility, accessibility, and neighborhood economic conditions. Sales 1 and 2 are located farther away from the downtown district relative to the subject and were adjusted upward for this factor. Sales 3 and 4 are located in the downtown district and were considered superior to the subject and adjusted downward for this factor.

Land SF. The land size adjustment is utilized to account for differences in the size of the land area between the subject property and comparable properties, as the amount of land can significantly affect a property's utility, development potential, and market value. The purpose of this adjustment is to ensure that the valuation accurately reflects how variations in parcel size influence economic factors such as income generation, parking capacity, or future expansion opportunities, and economies of scale. For example, smaller properties tend to sell for more on a per unit basis than larger properties. Where appropriate, we adjusted the Sales for this factor.

Topography. A topography adjustment is applied to account for differences in the physical terrain and elevation characteristics between the subject property and comparable properties, as topography can significantly impact a property's development feasibility, usability, and market value. The purpose of this adjustment is to ensure that the valuation reflects how factors such as slope, elevation, drainage, or surface conditions affect the property's suitability for development. All of the Sales have a similar topography relative to the subject and were not adjusted for this factor.

Primary Frontage Feet. The subject has superior frontage in comparison to Sales 1 and 2, which were adjusted upward for this factor. There was no noticeable trend in value related to the primary frontage feet for Sales 3 and 4. These Sales were not adjusted for this factor.

Utilities. The utilities adjustment is used to account for differences in the availability, capacity, or quality of utility services between the subject property and comparable properties, as access to utilities like water, sewer, electricity, gas, and telecommunications can significantly influence a property's development potential and market value. The purpose of this adjustment is to ensure that the valuation reflects how the presence or absence of these essential services impacts the property's suitability for commercial use and its associated costs or benefits. All of the Sales have similar utilities and were not adjusted for this factor.

Zoning. A zoning adjustment is utilized to account for the impact of zoning regulations on a property's market value and potential use. Zoning laws, established by local governments, dictate how a parcel of land can be used—such as for commercial, industrial, residential, or mixed purposes—and impose restrictions like building height, density, setback requirements, or specific permitted activities. These regulations directly influence a property's development potential, functionality, and attractiveness to buyers or investors. Zoning has driven land values in the subject's market. More properties zoned for more intensive land uses tend to reflect higher sale prices. Sales 1 and 2 have similar zoning designations relative to the subject and were not adjusted for this factor. Sales 3 and 4 have superior zoning entitlements in comparison to the subject and were adjusted downward for this factor. It is anticipated that the subject will became a part of an assemblage and rezoned to highly desired RAC-CC zoning designation.

Corner. A corner adjustment is applied to account for differences in the positional advantage of a property based on its location at a corner versus a non-corner site, as this characteristic can significantly impact visibility, accessibility, and market value in a commercial context. The purpose of this adjustment is to ensure that the valuation reflects how a corner location enhances or diminishes a property's appeal and utility compared to comparable properties. The subject reflects a high-profile corner lot. Sales 1 and 2 were adjusted upward for this factor. Sales 3 and 4 are corner lots and were not adjusted for this factor.

Traffic Counts. A traffic count adjustment is employed to account for differences in the volume of vehicular or pedestrian traffic passing by the subject property compared to comparable properties, as traffic counts can significantly impact a property's commercial desirability and market value. The purpose of this adjustment is to ensure that the valuation reflects how the level of traffic exposure influences the property's potential for business activity, customer access, and revenue generation. Sales 1 and 2 have similar traffic counts in comparison to the subject and were not adjusted for this factor. Sale 3 has superior traffic counts relative to the subject and was adjusted downward for this factor. Sale 4 has inferior traffic counts in comparison to the subject and was adjusted upward for this factor.

On the following page is a sales comparison grid displaying the subject property, the comparables and the adjustments applied.

Compiled by: AEI Valuation

Four comparable vacant land sales were selected from the subject's competitive market. These transactions occurred between 11/21/2023 and 2/3/2025, ensuring relevance to current market conditions. The sales were analyzed based on key factors including location, size, zoning, topography, primary frontage, utilities, zoning, exposure, and traffic counts, with adjustments made where necessary to reflect the subject property's characteristics.

The comparable sales indicate unadjusted sale prices ranging from $226.21 per land sf to $664.09 per land sf, with a median of $301.18 per land sf. Sales 1, 2 and 4 were given more weight in the reconciliation process.

After adjustments, the comparable sales range from $240.86 to $365.25 per land sf , with a median of $290.13 per land sf. Based on the preceding analysis, a value of $290.00 per land sf is concluded for the subject property.

Note: Demolition costs are nominal and have no significant impact on the "as is" value indication in this report.

Reconciliation

The process of reconciliation involves the analysis of each approach to value. The quality of data applied, the significance of each approach as it relates to market behavior and defensibility of each approach are considered and weighed. Finally, each is considered separately and comparatively with each other.

Value Indications

Summary of Values	
Value Premise	**As Is**
Date of Value	9/18/2025
Value Type	Market Value
Value Perspective	Current
Interest Appraised	Fee Simple
Land Analysis	$11,100,000
Cost Analysis	N/A
Improved Sales Analysis	N/A
Income Analysis	N/A
Value Conclusion:	**$11,100,000**

Cost Approach

This approach was not developed. The subject neighborhood will undergo intensive redevelopment is expected to start occurring over the next several years In the subject's competitive market. Additionally, many improved properties along S. Andrews Avenue have recently been acquired for land value and assemblage purposes.

Sales Comparison Approach

We found similar sales of land parcels in the subject's competitive market that were purchased for assemblage and/or redevelopment, when lends credibility to this analysis. Primary emphasis was placed on this approach.

Income Approach

The subject represents redevelopment land, therefore the Income Approach was not used in this appraisal.

Value Conclusion

The subject property was listed for sale for $12,000,000. The property did not transfer ownership and is not currently active on CoStar. According to Public Records there have not been any transfers or sales in the last 3 years.

Based on the investigations and analyses performed by the appraiser and presented in this report, and subject to the indicated conditions, assumptions, and limiting conditions, our opinion(s) of value for the subject property are as follows:

Value Conclusions					
Premise	Interest Appraised	Effective Date	Value Conclusion	Market Exposure	Estimated Marketing
Current As Is Market Value	Fee Simple	9/18/2025	**$11,100,000**	12 months	12 months
